

The gateway quiz

This semester, you will be given a “gateway quiz” on differentiation. The quiz consists of 7 functions for you to differentiate, and affects your overall grade in the following way.

- The gateway counts for two normal quiz grades.
- You may not use any books, notes, or calculators on the gateway.
- Initially, both quiz grades will be based on the score you get the first time you take the gateway (on **Fri Oct 15**).
- After Fri Oct 15, you may take the gateway as many times as you like, up to the 3rd midterm exam (**Fri Nov 19**). Over time, your second gateway quiz grade will be raised to match the highest score you have ever earned. The first grade, however, will not change.
- After Fri Oct 15, you may only take the gateway during my office hours: MWF 11:30-12:20am and MW 1:30-2:20pm. (Office hours may occasionally be rescheduled, but you will usually be notified before this happens.)
